OCTAL   D – TYPE   FLIP – FLOP

The TC74AC377 is an advanced high speed CMOS OCTAL D-TYPE FLIP FLOP fabricated with silicon gate and double-layer metal wiring C<sup>2</sup>MOS technology.

It achieves the high speed operation similar to equivalent Bipolar Schottky TTL while maintaining the CMOS low power dissipation.

This 8-bit D-type flip-flop is controlled by a clock input (CK) and an enable input ( $\overline{G}$ )

The signal level applied to the D inputs are transferred to Q outputs during the positive going transition of CK.

All inputs are equipped with protection circuits against static discharge or transient excess voltage.

FEATURES:

- High Speed .....  $f_{MAX} = 140\text{MHz}(\text{typ.})$   
at  $V_{CC} = 5\text{V}$
- Low Power Dissipation .....  $I_{CC} = 8\mu\text{A}(\text{Max.})$  at  $T_a = 25^{\circ}\text{C}$
- High Noise Immunity .....  $V_{NIH} = V_{NIL} = 28\% V_{CC}(\text{Min.})$
- Symmetrical Output Impedance...  $|I_{OH}| = |I_{OL}| = 24\text{mA}(\text{Min.})$   
Capability of driving  $50\Omega$  transmission lines.
- Balanced Propagation Delays.....  $t_{PLH} \approx t_{PHL}$
- Wide Operating Voltage Range....  $V_{CC}(\text{opr}) = 2\text{V} \sim 5.5\text{V}$
- Pin and Function Compatible with 74F377

(Note) The JEDEC SOP (FW) is not available in Japan.

PIN ASSIGNMENT

TRUTH TABLE

| INPUTS         |    |   | OUTPUTS   |
|----------------|----|---|-----------|
| $\overline{G}$ | CK | D | Q         |
| H              | X  | X | NO CHANGE |
| L              |    | L | L         |
| L              |    | H | H         |
| X              |    | X | NO CHANGE |

X : Don't Care

|                                  |                                      |                | V <sub>CC</sub> (V)    | MIN.      | TYP.        | MAX.         | MIN.           | MAX.         |      |
| Propagation Delay Time<br>(CK—Q) | t <sub>pLH</sub><br>t <sub>pHL</sub> |                | 3.3 ± 0.3<br>5.0 ± 0.5 | —<br>—    | 10.6<br>7.4 | 17.6<br>10.6 | 1.0<br>1.0     | 20.0<br>12.0 | ns   |
| Maximum<br>Clock Frequency       | f <sub>MAX</sub>                     |                | 3.3 ± 0.3<br>5.0 ± 0.5 | 50<br>80  | 95<br>140   | —<br>—       | 50<br>80       | —<br>—       | MHz  |
| Input Capacitance                | C <sub>IN</sub>                      |                |                        | —         | 5           | 10           | —              | 10           | pF   |
| Power Dissipation Capacitance    | C <sub>PD</sub> (1)                  |                |                        | —         | 30          | —            | —              | —            |      |

Note (1) C<sub>PD</sub> is defined as the value of the internal equivalent capacitance which is calculated from the operating current consumption without load.

Average operating current can be obtained by the equation :

$$I_{CC}(\text{opr.}) = C_{PD} \cdot V_{CC} \cdot f_{IN} + I_{CC} / 8 \text{ (per F/F)}$$

And the total C<sub>PD</sub> when n pcs. of Flip Flop operate can be gained by the following equation :

$$C_{PD}(\text{total}) = 20 + 10 \cdot n$$

## DIP 20PIN PACKAGE DIMENSIONS (DIP20-P-300-2.54A)

Unit in mm

Weight : 1.30g (Typ.)

## SOP 20PIN (200mil BODY) PACKAGE DIMENSIONS (SOP20-P-300-1.27)

Unit in mm

Weight : 0.22g (Typ.)

SOP 20PIN (300mil BODY) PACKAGE DIMENSIONS (SOL20-P-300-1.27)

Unit in mm

(Note) This package is not available in Japan.

Weight : 0.46g (Typ.)

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property. In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
- The information contained herein is presented only as a guide for the applications of our products. No responsibility is assumed by TOSHIBA CORPORATION for any infringements of intellectual property or other rights of the third parties which may result from its use. No license is granted by implication or otherwise under any intellectual property or other rights of TOSHIBA CORPORATION or others.
- The information contained herein is subject to change without notice.
